

Software Engineering G6046

Team Number	14
Names of team members present	Rohan Shah, Alexander Rojas, Evie Munro, Jude James, Rudy Pearson
Meeting Format	In-person
Date and time	5/2/2025, 13:00
Meeting Coordinator	

Matters from last meeting

- Based on class diagram drafted by Evie, Rudy and Jude implemented basic framework on the codebase
 - Player moves internally
 - All classes implemented for use
 - No graphic interface yet

Issues discussed at this meeting

- How to manage game states in the codebase
 - Rolling dice, making purchases
 - Giving the players more functionality, such as actions
- UI Implementation
 - Adding sprites and game pieces to the board

Decisions agreed at this meeting

- Splitting *space_util* up based on functionality
- *Player* will be split up into human and bot → Jude drafted new class diagram
- Design with a single player in mind, then modify for bot
 - Allows for faster pace
 - Bit more buggy but ultimately faster and cleaner

- Alex and Rohan to test latest sprint changes in the code
- Evie will update class diagrams
- Rohan to update documentation
 - Risk document moved to flexible sheet
 - Fill out Sprint End and Sprint Documentation
- Rudy and Jude to code various Issues discussed above
- Everyone will review their individual contributions on the Sprint document (shared copy)

Date of next meeting

- 4/2/25, virtual via Discord
